The Greater Scranton area is Pennsylvania at its finest. Scranton is a modern, progressive area, offering a low cost of living, high quality of life, superior educational and healthcare systems and strong ethnic and family traditions. Numerous cultural amenities combined with short commute times and affordable, safe and clean neighborhoods make Scranton a location of choice to live and work.

Greater Scranton offers one of the most affordable housing markets on the East Coast. Executive housing here is priced 30% less than homes in Philadelphia or Hartford and 50% less than Boston or Long Island.

When searching for a place of residence, renters have a variety of options from which to choose. Whether your style is contemporary or you appreciate historic charm, apartments are readily available at affordable prices.

These rents often include water, sewer, and trash removal, while some also include heat and cable TV.

Apartments located in older homes, within safe, established neighborhoods are available from \$600 to \$750 per month.

The cost of purchasing a new home in Greater Scranton depends upon factors such as size, style and number of bedrooms. Older homes (50 years or more), with two to three bedrooms, located on a modest size lot can be acquired for approximately \$150,000. This price range also includes some fairly modern ranch homes.

Newer two to three bedroom bi-levels and split-levels in suburban locations typically are priced between \$150,000 and \$250,000.

Modern (15 years old or less), four-bedroom homes, on fairly large lots in suburban developments, are offered for sale for an average price of \$230,000. The approximate price range for most homes in this category is \$200,000 to \$300,000. Total monthly operating costs for this type of home, including real estate taxes, gas heat, electricity, phone, cable TV, water, insurance, sewer, and removal of trash, will likely range from \$575 to \$625.

Large executive level homes often exceed \$350,000.

The average, per square foot construction cost of a new home here is approximately \$80, excluding the lot. The average cost to purchase a 1.2 acre, in a modern subdivision, with all utility services is approximately \$40,000.

# Celebrate the Seasons

We've got plenty of warmth and sun in the summer, spectacular fall color, sparkling winter days and breathtaking vistas of spring flowers. In short, if you live here, you'll enjoy four well-defined seasons.

Annually, 56 inches of snowfall results in excellent skiing conditions from early December through mid-March when average temperatures are in the 30s and 40s.

## The Business and Industry Loan/Grant Program

Department of Housing and Urban Development that provides financial resources to assist in the development of and expanding economic opportunities. The Program, which provides loans or grants to businesses who are located in Scranton or wish to relocate to Scranton. These loans/grants may be used to acquire real estate, to renovate business premises, to purchase machinery and equipment, inventory and working/operating capital. This program does not provide venture capital, nor can it be used to satisfy equity needs. Borrowers must create one job for every \$35,000 borrowed and at least 51% of the jobs must be held by low and moderate-income persons ( job creation is calculated on a full-time equivalency basis).

The primary role of the program is to stimulate and support private investment in our community with employers that can create new jobs in Scranton. The program is not the sole source of funding and rarely the largest investor. The program is designed to provide "gap" financing for activities and initiatives that meet our investment requirements.

## Workforce Innovation and Opportunity ACT (WIOA)

On-The-Job Training (OJT) is a specialized type of training, designed primarily for use with either public or private employers. Essentially, when an OJT Contract for employment is initiated with a specific employer, the customer, or job seeker, becomes the employee of the designated company or organization. The company pays the employee at his/her full hourly wage and provides all benefits as applicable. The employer then provides the number of hours the employee worked, on monthly basis, to the Workforce Investment Act Fiscal Agent through an invoicing made in accordance with a pre-signed OJT Contract, based on up to 50% of the employee's stipulated wage of the initiated contract period. Customarily, the length of a contract period is determined by the type and/or intricacy of training required, wage level, number and type of benefits, etc. and usually is drawn for two (2) to four (4) weeks in length. Longer term extended contracts are granted only in cases of extremely difficult training situations and inflated wage rates. Final determination of contract length lies with the Fiscal Agent Executive Director.
